

June 28, 2010 RESERVOIR LEVEL AND SNOW UPDATE

Flow in the Rio Grande at San Marcial is below 200 cfs, most of which is in the conveyance channel rather than the floodway. The cumulative flow volume since March 1 has been about 300,000 ac-ft, about the same as upstream at Bosque, but about half the volume further upstream at Otowi. Storage in Elephant Butte/Caballo is now below 600,000 ac-ft, down about 35,000 ac-ft in the past 10 days.

COMBINED STORAGE Elephant Butte and Caballo June 27, 2010 594,918 acre-feet
